that's what's the problem. I read in some posts about the repair of hp software, but to my luck the restore point isn't working. I haven't change anything, because I don't know where to start. I found this forum after long research in google but I didn't find anything. I don't know if I can upload a photo(Not able to make a image). I can't even open a image. I can't show my problem. This is my first time in the forum so I will be very happy if you can help me. Please help me because I can't go on. Thanks in advance. Goodluck. Attached Files:

Hello dear, Your e-mail looks like you are unable to upload a photo. So my first advice is to login on your Google account (not the one you use for this forum) and go to Gmail (your e-mail) then click on the Menu button to the left of the "Home" box then click on "Account". Click on "Settings" and then on "Sign in & security". Click on "Security and privacy". Try to use your Gmail account and then use the QR code to upload your pictures. One of the answers I posted is good for this specific problem and if you want to be sure your link has a good download click on the

little gear in the top right corner. Click on "Settings" and then on "Show Advanced settings" and you will see a box with "Image preferences" in it. Please try this. Any further questions please reply. Regards, david. Sep 4, 2015

Hi David, I have some questions for you. Thank you so much for this software. Any software for safe downloading and converting files to another format, like converting psp videos to mp4 videos?

Attached Files: Hello david. david. Hi, I was wondering if you can help me. I have a windows 8 and i want to make a bootable usb drive. I tried many times and it doesn't work. I was also trying to make a bootable flash drive but it doesn't work too. Attached Files: Sot of the problems of today. What has happened today? Not so fast. Yes, it can be a bit. Try here this free bootable tool and let us know the result. Good luck 4bc0debe42
