Keymacro has several playback modes: Single mouse click: It starts recording when you click on any button of the Microsoft Word window. You can repeat it multiple times and later go to the macro's playback options to either stop it at a specific point or replay it in a loop. Multiple mouse clicks: It will start recording when you click on any button of the Microsoft Word window. The recorded mouse clicks are saved in any order you want. After that, you can go to the macro's playback options to either stop it at a specific point or replay it in a loop. Copy and paste: When you click a cell in the Microsoft Word window, KEYMACRO will copy its content, including formatting, to the clipboard. You can then paste the data anywhere in your document.
