Feel free to report any bugs to the developer or make suggestions at support@mbsys.co.uk ***Fix these two bugs *** Please try out the Premium version. I am currently running the beta version at my house and it works great. I have done 4

builds of the software so far.

Bug 1: If you have problems with the #1 bug above, you need to report the bug using the report tool in the software.

Bug 2: Issue here is that I need to set the LibreOffice/MySQL password as well as the PAM's password. I do not know how to change the MySQL/Firewalld password so I can only use the generic MySQL password that

was created when I installed the software on Ubuntu 20.04. Hopefully the developers can fix it. I know this is a bit off topic for this topic but this is a computer and a LibreOffice computer at that. Anyway, enjoy the software and report any bugs. Please rate this software when it is updated.
