Q: Keras Dense output not consistent? I am trying to input a.csv file into a model that has one input and multiple outputs, all of which are of the same dtype. (refer to an example here). However, this doesn't seem to work for me. My input is the following: `image_data = np.loadtxt(FILENAME, delimiter=',')` The output of my model, however, is not: `for i in range(len(data)): model.add(Dense(128,input_dim=1, activation='relu')) model.add(Dense(2, activation='softmax'))` Where FILENAME is the name of the.csv file as defined above. The output of the above is: 'Model' object has no attribute 'add'. Is there any reason this would be the case? I have this same situation working as expected for a model with fewer inputs and outputs A: I can reproduce your issue if I use Keras 2.1.4 `import numpy as np import tensorflow as tf from keras.layers import Input, Dense from keras import Sequential from keras import backend as K data = np.loadtxt(FILENAME) model = Sequential() model.add(Dense(128, activation='relu', input_dim=1, name='myDense')) model.add(Dense(2, activation='softmax', name='myDense2')) model.summary()` But If I use Keras 2.1.7, the model will be correctly build. Thanks - I will let my associate know. Bruce Lundstrom@ENRON\_DEVELOPMENT 04/23/2001 12:27 PM To: Jeff Dasovich/NA/Enron@ENRON cc: Richard Shapiro@Enron@ENRON\_DEVELOPMENT Subject: Re: Cal ISO power quality information Jeff - I wanted to let you know that we have a contract in place with Cal ISO Information Services to supply this data. PowerPool Energy on behalf of IR, the only other entity with access to this data, is providing some data that they have assembled and provided to us. I also wanted to let you know that we have asked the Enron Corp. Legal Department to put together a memo that describes how ISA and DWR can gain access to the same data, since both organizations are in a position to provide or receive information about ISO power quality data. This memo should address issues such as terms, data ownership and distribution, distribution terms for wholesale sales, etc. I attach the "Legislative Report" by the ISA Board of Directors that is cited by the ISO when they report the data in their April 25, 2001 "Technology Assessment." We have already obtained a copy of this report.
