Roblox is an online game platform and game creation system developed by Roblox Corporation that allows users to program games and play games created by other users. Created by David Baszucki and Erik Cassel in 2004 and released in 2006, the platform hosts user-created games of multiple genres coded in the programming language Lua. For most of Roblox's history, it was relatively small, both as a platform and a company. Roblox began to grow rapidly in the second half of the 2010s, and this growth has been accelerated by the COVID-19 pandemic. Roblox is free to play, with in-game purchases available through a virtual currency called Robux. As of August 2020, Roblox had more than 164 million monthly active users, including more than half of all American children under 16. Although Roblox has received generally positive reviews from critics, it has faced criticism for its moderation, microtransactions, and exploitative practices

directed toward children. Roblox's website features chat rooms, a virtual wiki, and a game search engine. It also contains an official blog and official Twitter account. Content on Roblox is uploaded and voted on by users, who may make new content available for others to play. There is a wide range of content on Roblox, ranging from simple games, to complex Java games, to full 3D virtual world-building games.
